10 Oct 78 John CASPARE SHA called and talked about
Proposal submitted Sept. 1978
1. R.S. why increased time for Ron & Rita —
me: "original proposal not realistic — when I had
to defined project checkers activities (20%) vs.
Ardsee-Supervision activity & realized I need
Ron & Rita to fill gap in team C when I was
working with other teams. they were available
also needed extra time for Field Lab. work.
they agreed.
2. Rita to operate as typist / draftsman
me: yes.

Is He: accepted this reasoning?

∴ Σ Capone mentioned that some of charges due to meeting — Krakah(?) approved increases. (as in field Photographing supplies)

P. 10. Comment — Why increase in rate + hours
me: original rate (7.00) 2nd hand from Thomas
originally just he to use them
rethought — use for all team as
convenience (7.50)
Rates from her as well as Hours
(120)

P. 10 Conservation — Why duplicate on lodgings (2)
and road taps (8) —
me: to give him a choice — ~~def~~
flexibility needed.
accounting assumed high receipts.

P. 11. Archmist.
Why more field days than original
me: opportunity & thought 10 + 5 to
write up.
He: no cell time in field.
no mileage — me: thanks add it from 5
road taps.
Check 10 — He: no reinterment fees
me: thanks need them — in oversight
$2000 in original should be
there

Capone: to be completed with this in 2 days
Board of Public works to get proposal
in November
me: some flies before can start
He: yes.
He is satisfied with proposal & will push it through

∴ Sandy like all is got — Commented Chief
Krakow apparently satisfied with
advisory council meeting.

Early October.

note Fisher called Back on the Panel See 2 pages back

Asked me

1. which name I would prefer (Excluded, garden McNit, garden as preservation)

2. what I thought was meant by advisory council meeting Sept 15 - Since Mrs Slagels aide seemed to think the obligation to "Design monitoring program" still held.

I said:

1. I thought meeting indicated that Hearing on program not required.

2. Suggested that Harter be put on record as to meeting — i.e. Harter advisory adviser to advisory council — tell them not required

3. Logic of SHA position — & what I said.

a. Mitigation of impact to be accomplished by representative excavation & not by site burial as assumed by advisor council before our meeting

b. SHA interested to encourage data getting on monitoring effect of overlay of road on a site but does not feel able to initiate such research since it will not be contributing on U.S. 15 to mitigation problem (solved by excavation).
