20 April 87

Cloudy, sprinkling, warmish, windy.

Starting to clean backdirt from IA. Good crew. Bolm out + Charles.

21 April 87.

Cloudy, warm.

Still cleaning area IA. Buby laying in grid with Dennis + Mark

22 April 87

Clear, hot
Everyone busy. Almost finished with IA. Cleaning IC. Did time sheets. Charles out. Talked about water.

23 April 87

Spitting, yucky. Thursday of course. Buby relaying IA. Slightly off north to south. Cleaning area IC still. Opening up a 2x2 in the SW corner of the hyplen. (Kathy + Bob)

24 April 87
Raining & cold. Cleaning trailer. Cleaning brush. Searching for bones.

27 April 87
Clear, cool.
All sorts of new fill got out too.
Opening 2 2x2's in FC.
Feature 82 - Area FC is a flowerbed not a building trench. Clay as thick at the other corner.

Norm making progress. Down to B in 4' 1x1's

28 April 87

Clear, windy, cool.
Area VA - can't find out anything the way it was done. Second structure thing shot out of the water. The brick piles are feature 6. cist (F 73). Appears to be a retaining wall for the terrace. In order to prove this we are going to make sure F6 & F73 don't join. Then a 2x2 east

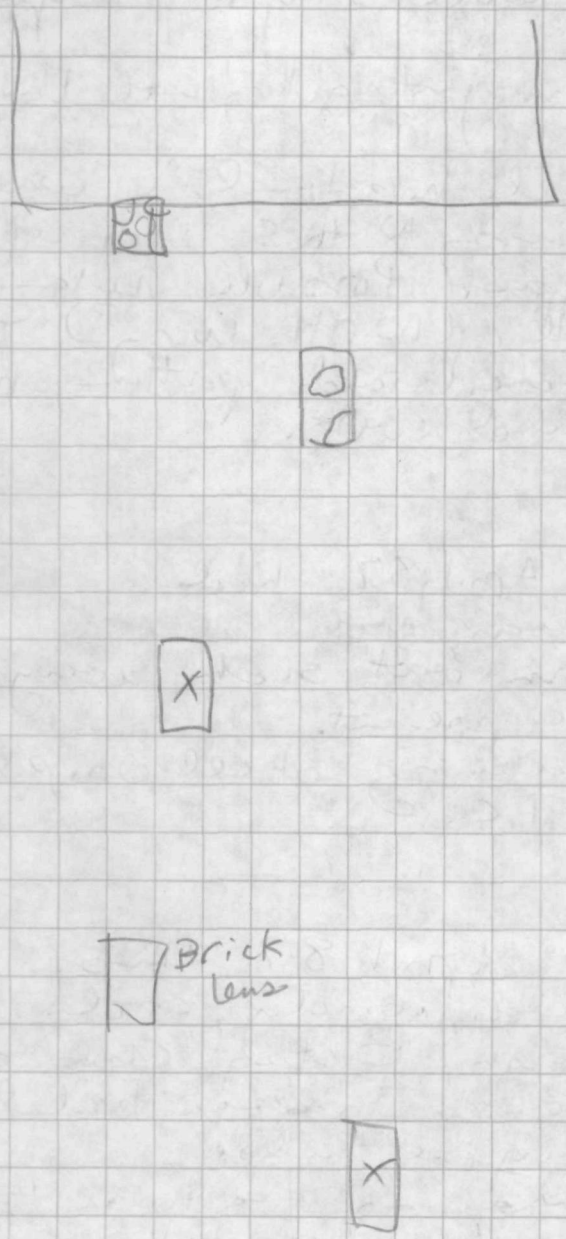
to check the extension of the wall Billy Ray happy.

Norm just getting into Layer B.

Circle has found a wall running N to S west of the hyper. Possible retaining wall. (North wing?). The checkerboard pattern here should work.

29 April 87 Wed
Clear cool
Norm out sick everyone else present.
Featuring shell drip line in IC.

30 April 87 Thurs
Clear, windy, cool.
Norm, Betsy, Ann out sick. Traffic held up everyone else.
Assigning feature #'s
Who crazy in IA.
In IC going down in layer C. Brown sandy clay about 40cm deep. Artifacts decrease but don't go away. Going to take down the south west ¼



Brick
lens

Eric taking down F. 86.
No pictures cause its
not defined.

1 May 87

Clear, cool, nice day.
Mark 11:15

3 May 87

Mike R. in at 10:00

May 5 87 Tues.

Rained out yesterday.
Cloudy & cool today.
Ann getting plastic. Mike R.
with her.
Bailing.
Cecile working in 2
2x2's.
Changed crews today.
Clay cap gets funky at
the north ledge of the area.

Betsy taking over temporarily
for Donna. Opening
two new 2x2 in the southern
portion of the area.

Billy Ray's area very confusing.

Dan, John & Charles out on the p.m.

More time in Anac VA.

12 May 87

Backhoe Cutter arrived yesterday. He's absolutely hell on wheels. By today we're basically caught up on supplying him. He's removed most of the rubble from the cellar with a really minimal amount of hand labor. The cellar is divided into 6 different rooms by brick walls. The northern rooms have brick flooring. The north west room had mortar over the brick for a smooth finish. The north east room has a fireplace.

Judy: 765-0737

5/22/87 Fri

Cloudy, drizzle.

Area IA - Betsy finished with posthole - brick wall going south from feature 89. Will dry there next.
Dave taking up charcoal matrix. Overlies a sand matrix to the west. Very distinct stratigraphy.
Katherine excavating Feature 87A. Probable trash pit within rectangular brick feature.
Dance working on the cistern. Taking off clay strata
John working on cobble flashing around house.

IC
Mike opening new 2x2 farthest down slope.
Finding aboriginal ceramics in the buried A horizon identified here.
Natural terrace drops off quite steeply.
Seems to be a deposit of bricks here
Wall in other units continued for 3 2x23

There is a major disturbance
north of these units.

26 May 87 Tues

Cloudy cool

Ann out as usual.
Company coming today
Seven people out yesterday
Didn't do too much actual
excavation but area VA
looks great. Have found
a very definate line between
feature 6 + 73. They do
not intrude on one another.

Taking out the area around
the cobbles in IA. Lance
working on the cistern
Need to locate the N/S
wall from the east retaining
wall.

IC opening up new unit
west to check for natural
terrace. Looking for
bricks SE. Digging out
tree North.

28 May 87

Muggy, clear.
Lance out with his ankle
Cover IA progress steady
Post holes lined up. CW
not NS.

Betsy taking out cobbles

29 May 87 Friday

Dense fog.
Everybody but John out.
Cecil out.

Betsy C on F 136.
Doug on Layer C.
Dave on F 138
Katherine on F-88
Lance on Layer B aster.

Check Carson
Profile

1 June 87 Monday

Hot + muggy
Starting at 7:00 from here on out.
Everyone but John here today.

Progress in IC slow.
Working on finding more of the cobble & shell trench.

Open 2x2 dark st. deep room
Ceramic vessel
Missing bricks

Soil samples but VA/VB

VB what needs to be done
Sample features + Area
5 2x2's (1x1's)

8 June 87 mon

Clear, cool so far.

Going down in the red gravely clay around the well. Interior diameter less than 4 feet. Not finding much in the clay. Still destruction debris in well.

Betsy tabling up brick floor towards the central

10 June 87 Wed

Clear, windy, cool
John Milne out at 10:45
Silas Henry + Kate
some body too.
What a zoo!
Working on the north
fireplace. Taking out
the fill of the east
fire box.
Done

11 June 87 Thurs.

Clear, warmer

Finished up with the well
yesterday. Down below the
safety range with little
hope of anything but
destruction debris. The probe
went all the way down
with no change. Oh
well!

Taking out the various chambers
of the north fireplace.
Finished 23A the main
firebox. Artifacts light.
Taking out the kettle settle.
This is a rounded area
to set a kettle in. The
bricks appear to have be-

intensionally broken to
for the Cindee. Lots of
shell in the matrix, Some
black transfer print pearlware.
Pretty late stuff.
Dug around behind the fire
place on the east side.
It appears that the entire
cellar was constructed like
the south side but the
original north chimney support
fell or was broken off and
all of the modifications
now visible are pretty late.
(Berry period). What they
build was an oven with
a stoke hole, a kettle
settle place & a fire box.
There are at least one,
maybe two flues behind
these.
There is a place in the floor
in the extreme NE corner
where the bricks are layed
in a different pattern. Under
neath is the thin sand
layer with the bricks below
being mortared. The rest of
the lower floor is not this
way. This room is exceptionally
weird, a brick floor was
laid in a really dumb
pattern ⊞ on subsoil. This
floor appears crushed and

worn. A layer of sand was placed on top of this and a new floor laid in a herringbone pattern was laid on this. The lower floor was very uneven. Much, much better in front of the fireplace.

The whole structure is alternating headers + stretchers, with one north/south central wall and two east/west dividing the cellar into six rooms. There appear to have originally been 4 fireplaces. There are places on top of the walls where they don't appear to have been restored.

12 June 87 Friday

Cloudy, cool.
All present.

IC. Katherine taking out the north ½ of restored, Eric taking out the south half of large circular feature. Taking down B to fill brick rubble stuff.

IA - Finishing the day cap. Finding features pretty high in the matrix. Lots of recent

15 June 87 Monday

Very humid + hot - Yuck!

Becky out sick. Jeff out at 9:00. Hope no one else gets it.

Eric spent the weekend reading seditious material. Prehistoric archaeology. He thinks we have a pit house in IC. These things supposedly come in clusters. Dam. Charls + Sandy coming out to look today. Still searching for the edge of the brick rubble stuff at the south end. Kathy coming up with weird grey mottles in otherwise gross clay.

1) Test hole to
paleo soil
2) Feature down if determined
3) Test 1x1's 1% of area VII
4) 2nd feature

[Grid map Area VII + IV

the 1/2 checkerboard.
Finished John + Doug
2x2.
Do we need to do
2x2 south of
brick pad?

Charles said to finish
cellar.
Need to take out new
floor + go down
through features under
floor.

17 June 87 Wed

Clear, going to be very hot.
Jeff + Lance out sick
Mike in n-dimensional
hyperspace.

Have finished the checkerboard
in IA. Starting to chunk
out the units between the
post holes. Not screening these.

Down in IB we've taken out
more floor to delineate
Assigned feature #'s for
the sand under the brick
floor.

Working on the northern
area of IC. Have an
historic protocol. Not
much else.

Took feature 130 down
3/4 cms. The gravel is
part of the patio set.
Just like the 1x1 we
took down but not
quite as neat.

PG GO SS

18 June 87 Thurs

Area IC – VII Digging
1x1's. Still in hysterical
all over.

19 June 87 Fri

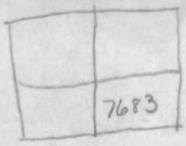
22 June 87 Mon

Humid & hot. Yuck.
Crile out. Sent Dave to
work with Billy Ray.
Lance finishing up the
fireplace paperwork.
Betsy drawing profiles.
Doug popping out unit
where wall runs into
the manor house foundation.
John mating trenches.
Lots of features in the
unit related to the cistern.
Will pop out the one
south when the paperwork
is finished.

23 June 87 Tues

Bad traffic. Got here
after 8:00.
Clear & going to be hot

Dirt: per person/day
per area



Taking out units in Area VII. Down 60 cm in test-field. Burned A horizon

Found trench with 3 postholes running N/S on the west of the cistern.

24 June 87 Wed

cool, cloudy.

25 June 87 Thurs.

warm, clear.

Judy out again. Bonnie back.

26 July 87 Friday

Warm, cloudy.
All present in body if not mind.
Cecile doing Harris matrix in trailer. Jim babysitting IA.
Dave taking up the floor in 122A. No distinct sand layer underneath.

Betsy taking out floor around the fireplace.
Beautiful stratigraphy in the sand.

Doug working in the hyper. Has found a builders trench on the west inside wall. Not down to sterile clay yet.

John doing NE 1/4 of F-76 cistern. It appears to be stone lined or perhaps faced mortared pebbles.

3 July 87 Fri

Clear, hot.
Cecile out. Everyone else here.
Starting to take out the SW 1/4 of F-76. cistern in order to define the diameter.
Doug still in the entryway to the cellar. Dave putzing with little features in 122A.)

IC Lane has found a continuation of the shell cliphine at the south side of the house.

6/ July 87 Mon

Cloudy, muggy

7 July 87 Tues

Misty, cloudy, cool comparatively.
All present.
Dave down in the cellar finishing 2x2 east of his one with all the little features.
It now appears that there was a room under the older floor. Aris found aligned bricks and a pebble/clay lense that in N/S. Will open the

unit to the north of this to determine the extent of the room. We need to look at the early inventory for the cellar. If all this is happening in 122A what happening under the floor of 122B?

John + Butsy doing plans + profiles of the cistern. Finally got the concrete wall in the SW 1/4.

Doing doing the features around the NW corner of the mono house.

We have a new person today. Phil went to our IC. We're starting to make progress down here. Working close to the house plus to the east and west of the original line of pits.

Bonita finishing the walls of the mono house.

Billy Ray going west for the cellar entryway. Lots of gun parts and round metal things. Also going

179
162

North to find the north wall
and working to the east
on the outlying features.
Came home sick at 12:00

7/8/87 Wed

Hotter than hell

Bonnie & Mark in at 8:00

7/9/87 Thursday.

Cloudy, breezy
Doug onto F-207

Hot, humid

Mark in at 8:00
Becky out at 9:00

Tom in north end of cellar.
Mark in Layer 03 at west
end. Bonnie screening
Kathy Fobes in VB
checkerboard.

14 July 87 Tues

Hot, humid, expecting rain

Jeff + James home at 9:30.
Tom out all day.

Crew switch.

Joh still on west side of
the manor house. Dave
in the basement finding

more weird stuff. Phil taking up 122B floor. Doug working on very weird array of features in the NW corner of the main house.

Betsy taking up cobbles on south side of the house. Eric finishing unit with large feature. Mike working on 112. Kathy F, + Katherine on A's.

15 July 87 Wed

Cold, clear, windy.

Lance + Kathy F. out with the plague.
Kathy C + Dennis leaving at noon.

Bill plodding along in the cellar. Hand going a slow. Screening that stuff takes forever! He's also down crew.

Tried to hire people last night with no luck. Need to have the papers signed for the extension first.

20 July 87 Mon

Clear, hot. No rain in sight

Fance still grounded. Jeff at the doctor's in West Chester.

Cleaning up for the dog + pony tomorrow.

21 July 87

Clear, hot.
Cleaning for the dog + pony still in VA

Fance still out.

Popping the last of the clay cap in JA.

Still on features in NW house corner

Dave + Phil still in cellar

Betsy on features south of house. Eric in prehistoric

Found the NE corner of the cellar in VA. It is plaster inside then grog then timbers. Not bad for construction details.

26 July 87 Wed

HOT Clear

Lance out. Everyone else here

27 July 87 Mon

Cooler (relatively) clear

John & Mark out. Lance back.

Phil excavating possible

28 July 87 Tues.

Cooler, less humid, ok
Becky at the archives for Charles. John still in WV.
Betsy home sick. Cecile too. Bory howdy.

Jeff inexorably immersed in plantation lay out.

clts discusting.

29 July 87 Wed

Clear, ok
John out with a broken car.

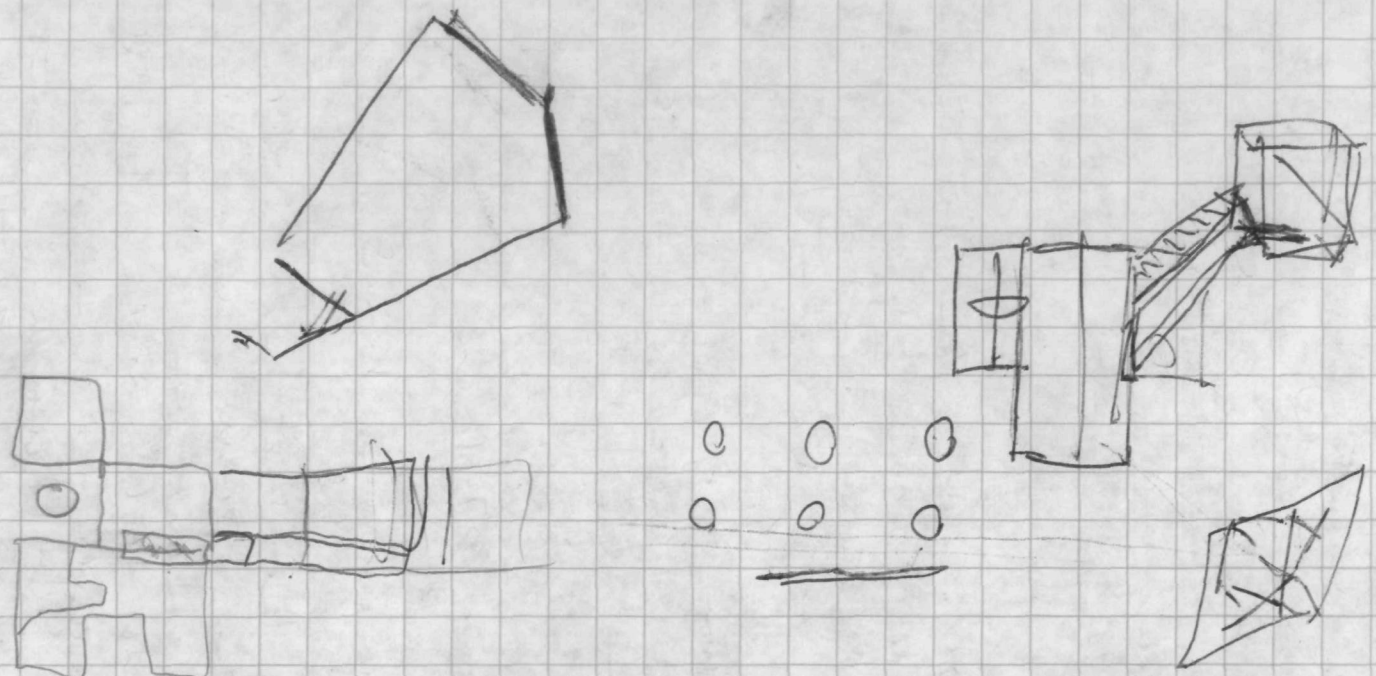
Dave finally down to sterile. Phil still in builder trench. Don still in Builders trench.

Katherine digging features. Most everyone else — IC taking off fill

3 Aug 87 Mon

Clear, warm, humid.

On the last week we've gotten 8 new crew members. The check from West Chester took forever. It will only cover per diem so we have not enough equipment for all these people. The water tank won't fill the screen entirely



4 Aug 87 Tues

Clear, humid, going to be hot

John VV at a funeral.
Everyone else here.

Judy gave two weeks notice today off to Mt Vernon to be assistant to Dennis Ponge. How neat.

Judy opening 2x2's like crazy. Taking off brick rubble - the south.

5 Aug 87 Wed

Hot Humid.
I was out sick today.
John Wonderly also + John VV
I think Jeff + Betsy coped.

6 Aug 87 Wed

Cloudy cooler. Very humid
John V.V. out for the court. Phil out with his wasp sting Jeff at the office.

Aug 11, 1987 Tues

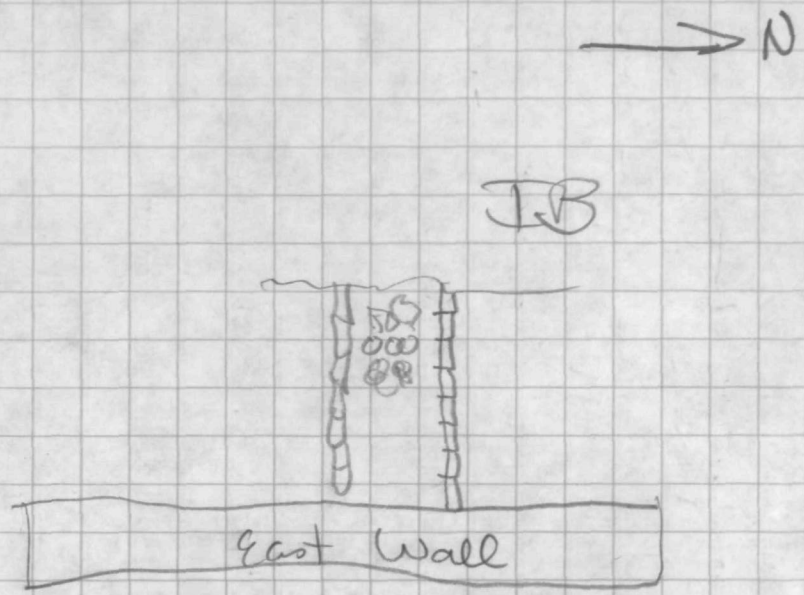
Cool, clear.

Tom out sick. John out sick.

Aug 12, 1987 Wed

Tom still sick, Mark hunting for his cat. John W on his back.
Company this morning. Forest Services and BLM (Annetta)

Area IC making massive progress. Bob Kingsley out Mon + Tues to work on the prehistoric stuff. We seem to have a prehistoric pit house with a hey hole entrance way. Very little in the way of artifacts. Some abraders. One ceramic. Well made. The southwest corner appears to have been intruded upon by a possible historic posthole.



N
IB
East Wall

Area IA Doug finally out of the Dul corner and onto F 89D the wall trench leading into the North wall. It is a very regular trench where bricks were obviously laid then robbed. Trench is filled with mortar & window glass. Nancy popping features left & right. Defining postholes. Anna on IB west of manor house.

The cobble flashings on the east side of the house don't appear to be there. Understand there is a line of cobbles that appear to boarder a different type of soil. Heaven only knows whats up.

Phil in the cellar has found the earlier floor to be irregular at best. There is a meter wide gap in the lower floor. This seems deliberate with some brick fragments laid in the gap (at a latter time?)

IC Katherine has found a fragment of a brick

☆

wall at the South west corner of the house. Probably an 19th cent garden wall.

Have two post with preserved post in the southern portion of the area. They seem to cut through the fill. Probably late.

☆ Water Truck out today. Suggested a three inch hose or a pump.

☆ Chainsawed down about 3 trees in each of areas V + IC. Got the one in the way of the stairway. Then filled on on a wheelbarrow. Got the ones potentially in the way of excavation in IC.

Katherine getting lots of domestic goo gas near the SW house corner.

☆

14 Aug 87 Fri

Cool, clear. T-shirts here finally. Tor + Dave out sick. Cecil + Judy both have dental appts.

Judy's last day!
Wrapping things up + transferring the runs to Eric. Changing some of the designated layers of F-125 to regular layers. Excavating pits + fill.

IB - Phil in cellar. He seems to think there were 3 floors, down there, i.e. Subsoil with a living surface. Then the lower brick floor. Then the rubbly stuff was put in to fill the gap then sand then the upper brick floor.
John W. taking off destruction debris in NW corner. lots of window fixtures.

☆ Bruce Lutz taken away by an ambulance, experiencing massive back pain!
Betsy went with him to the emergency room.

Billy Ray has almost got the stump out of the "stairwell" We'll see.

17 Aug 87 Mon

Humid, clear, going to be hot.

Doug, Becky, JW, Phil out Don't know for how long. Must be Monday

Put two new red wheelbarrows together. New buckets & clips.

Billy Ray in hyperdrive. Going into salvage archaeology mode.

Cecile estimates shill be done by weekes end.

Eric on the job as crew chief.

More features in IB + IA

Steve Raga

Brick rubble in NW corner of unit in the SW corner of the house. Finally found the postmold in Betsy's unit.

Pat O'Neele

Dana Heck

Becky Sterling

Wally Princeman M.A.

Larry Moore

Bruce W.C. form
- medicine
-
-

18 Aug 87 Tues

Cooler, breezy.

Doug + Bruce, Cecile out
Took Phil + Betsy home at
9:30 Betsy Coder out with
her car. Joe at the dentist.

19 Aug 87 Wed

Cloudy, warm.

Betsy, Phil, Bruce, Doug
out sick.

Bill has found a 12" post that sits on an 8' ground sill in the SE corner of F-6 cellar.

21 Aug 87 Fri

Clear, hot
Bitsy + Bruce out

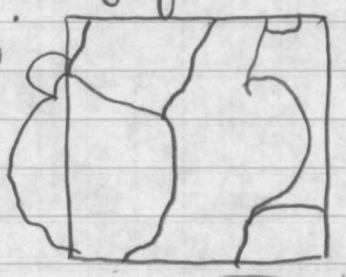
Found another Portland cement cistern. Looks like this one had a brick top edge. Smaller dimensions

24 Aug 87 Mon

Clear, cool. Dave's out.

Mark has found the stairs finally. The burned wood ramp the had been uncovering is the backing for the stairwell.

Lots of features in Kathy's sq.



{Concrete Portland cement
→ {Cement
{Mortar

25 Aug 87 Tues.

Clear, cool. Nobody out today.

Down in cistern 20cm. The artifacts from this one contain a lot more domestic debris (so far) than the other one did. A hoe, whiteware, stoneware etc. Prehistoric.

Bill digging a posthole with pretty vertical sides. He thinks its a well. Its not.
Kathy's feature 381 has become a shallow thing with a possible posthole in it.
Mike has uncovered a very large rectangular area. Perhaps some sort of a planting feature

26 Aug 87 Wed.

Cloudy, cool, no rain yet. Katherine out. JW out

The cistern has gotten too dangerous to finish with

our current technology. We'll wait till Anthem comes back.

27 Aug 87 Thurs.

Humid, clear (right now)
Katherine out, Jeff at office. John P Mc here for the morning. We have to do reviews on Bruce, Becky + Mark all up for regular soon.

Lance down to features.
Elizabeth same.
Mark working on a very large pot hole/postmold
Joe finished with Eve
Bonnie digging postmold that has turned ~~to~~ part of a trench.
Lance moving to Davis 2x2.
Dave can't really excavate anymore because of mono.
I think we have an epidemic of it here.

28 Aug 87 Fri

Foggy, warm.
Bonnie never showed up.
Kathy + Katherine out

Elizabeth told to
"take it down a little."
Dave plugging in his unit.
Joe doing notes. Lemar
trowling. Mark in a
feature.

John still in posthole?. Amara
going down. Phil

31 Aug 87 Mon

Clean, cool.
Massive damage from
Fri afternoon's storm.
Wheelbarrow tree down
as well as quite a
few others. What a
mess!
Author arrived at 8:30
or so.
Doug & Tom got left
home today. They arrived
at 9:30 for work.
Author cleared off the
top of the cistern and
the Ranger rubble
~~Water~~
within it. Then he
dug a 2 bucket wide
trench in the south of
IC in order to check the

extent of the artificial fill layer. Need to scrape & profile this.
Moved fill from above the front stairs of the manor house. Now moving fill from the southern corner of VA. Some of this is beautification for aerial photographs.

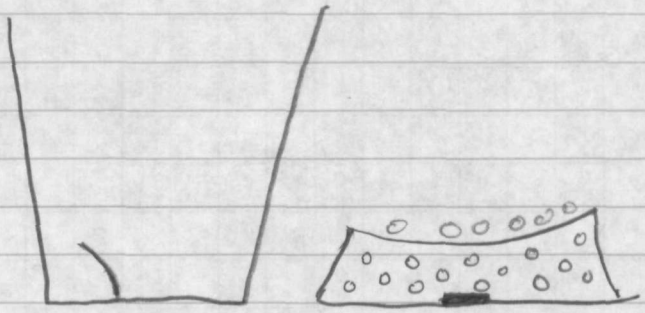
Cistern below backhoe is coming up with institutional white ware, baking soda bottles & window glass.

Charles out from 2:30-3:00

1 Sept 87 Tues.

Clear, warm. No rain expected.
Katherine still out. Part in Perry Point.

Cecil finished the cistern today. It has a type of sediment in the bottom type and is attached to the other cistern.



3 Sept 87 Thurs

Cool, clear
Betsy sick, Nancy out,
Pat at Perry Point.

Jeff renewing Toyota.
John V.V. cleaning, area VII

4 Sept 87 Fri (Thank god!)
Cloudy/clear, cool.
Tom took off. Betsy + Phil
sick. Pat still at Perry
Point.
