and is sewed with Nylon Waterproof Thread.**

301, 303

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

222 1945
806, 145

MONDAY 1/14/85

AFTER New comers (crew) were finished being assigned to rooms, they went out to site. Tom Wheaton made assignments of crew to crew chiefs - Bob Dunn, Allison Cooper, Scott Simmons and Steve Gaber assigned to me.

Unit 12 and 13 were started.

Most of the day used getting used to filling out level forms and getting proper orientation. Area 1 grid system.

Good part of morning spent putting large shelter back together after being blown apart during weekend. Some units frozen in first $1\frac{1}{2}$ inches.

TUESDAY 1/15/85

STEVE GABER ABSENT - TOOTHACHE

ALLISON ORPER ABSENT - SICK

SCOTT SIMMONS PRESENT

BOB DUNN PRESENT

LYNN PIETAK HELPED ME - NO PLACE TO GO

30 knot winds over night and during day blew apart large hut. After patching it up, decided an hour later to rip it apart and make small 10' X 10' huts for each excavation area or crew teams. Day spent making huts. Covered with straw inside to keep ground from freezing more.

WEDNESDAY 1/16/85

STEVE GABER ABSENT ALL DAY (DOC'S APPT)
ALLISON ~~CHERPER~~ IN LAB & AT SITE THOU
NOT WORKING WITH ME

SCOTT SIMMONS PRESENT; LEFT AT
2:30 TO DELIVER LETTER IN BALT.

LYNN PIETAK PRESENT; LEFT AT
2:30 TO DELIVER LETTER IN BALT.
BOB DUNN PRESENT

LYNN FINISHED EXC. LEVEL 2A OF UNIT
12 IN AREA 1. NO MORE THAN BRICK,
SOME MORTAR & OYSTER SHELL WAS
FOUND. STARTED LEVEL 3A, SOIL
SAME AS 2A - STRONG BROWN.

SCOTT CONT'D W/ LEVEL 1A OF UNIT 13
IN AREA 1. 1 or 2 pieces WHITEWARE
& COAL FLECKS FOUND. COMPLETED
THIS LEVEL & 2A WAS STARTED. ~~RE~~
STRONG BROWN COLORED CLAY.

BOB HELPED BOTH LYNN & SCOTT FOR AWHILE
AND THEN STARTED UNIT 13 LEVEL
IN AREA 1.

I LEFT AT 3:15 DUE TO HEADACHE

THURSDAY 1/17/85

STEVE GABER PRESENT: Opened
unit 54 of area 1, level 1A.
Bag no. 65.

SCOTT SIMMONS PRESENT: CONT. TO
complete level ~~2A~~ in Unit 13
of Area 1. Coal flecks found.
Dick photographed, completed
~~unit~~ level 2A. Excavation compl.
of unit since more than 5cm into
orange (strong brown) subsoil.

BOB DUNN PRESENT: Completed level 1A
in Unit 53, Bag 36 in Area 1. 1A
was an arbitrary 10cm level. Compl
this level and started level 1B.
~~Comp~~

ALLISON COERPER ANSWERED OFFICE PHONES
in Jim Wilson's appt (since Jim in hosp).
Allison out at site part of afternoon.

LYNN PIETAK sent to screen artifacts.

FRIDAY 1/18/85

- STEVE GABER PRESENT: Continued excavation of level 1A, ^{unit 54} (natural level). Completed level with help of Scott & myself down to top of 2A. Some oyster shell, brick and stones (pebbles). No features but terminated excavation because Bob had features in his level 1B (bottom, or top of 2A) unit 53. Elevations & plan view done w/ photos. Summary sheet not done until features in Unit 53 are exc.
- Bob DUNN PRESENT: Continued exc. of unit 53, level 1B, bag 51 in Area 1. At bottom of 1B noticed dark stain fea #7 going into unit 94 at north grid line. Feature #8 assigned to oyster shell concn at south grid line going into unit 12. Unit excav. ~~finished~~ terminated at bottom of 1B where natural soil change in color to strong brown. Will excav feat's later.
- SCOTT SIMMONS PRESENT: Helped Steve & Bob in their units. Put some new wheel borrows together. Prepared new hut area for Monday exc.
- ALLISON COERPER PRESENT: WENT SUPPLY SHOPPING FIRST OF DAY. HELPED PREPARE NEW TENT AREA FOR MONDAY.

MONDAY 1/21/85

Called off because of sub-zero weather.

TUESDAY 1/22/85

DAILY LOG 2/6/85

Allison C - present

Steve G - present

Roxanna P - present

Brenda - Present

Bob Dunn - came in at 12:30pm

Very frozen ground for about
2 hours until 10:00 or 11:00am.

Crew screened for about
2 hours then work began
on units 277 + 278. Unit
278 completed - photos taken.

mapped. Unit 277 down to top of 2A. Will take down 5 more cm.

Feature #28 north half was profiled and began excavating south half. Will finish Feature #28 - 2/7/85.

Shortage of wheelbarrows - had to use buckets of which there is a shortage also because screening is backed up.

All in all it was a rather slow day. Enthusiasm not too high among group. Weather has the most to do with everyone's mood!

Tomorrow should complete 277; feature #28 & open 318 & 319.

4/9/85

Ramona and Robert have each taken turn excavating in the well this morning. Weather is really lousy this morning; snow flurries and wind. One minute sunshine the next. Is considerably colder today. Hope to finish excavating down to the 244 cm. level for lunch.

A group of school children toured the site, with Aggie as guide. They stopped briefly at the well and I explained to them what we were doing and what kind of artifacts we were finding. We moved the shelter back over the well soon after they left because of the weather.

Oyster shells and charcoal are still the dominant "features" at the present level (240 cm.). Most of the oyster shells coming out of the well are considerably larger than those found in features on the surface.

Completed the final level of the well (244 cm.) at 11:15 a.m.
Can go no further until the engineers come and shore up the side.

Ramona has gone to water screen for the rest of the day, and Robert and I are going to help Bill Huser dig the fill in area 1. Bessie will be back tomorrow.

Doug

4/29/85

ETS
cm

Ca. 5m. 50 cm. hit a
lighter color sandier soil
that covers both N + S areas
of floor. Have layering
like a marble cake of lighter
soil & darker soil. Have
area in SE section w/ gravels,
cobbles, oyster, brick frags & Charcoal.
Took Soil sample - Soil looks
water deposited. Still getting
clay balls -

54R $\frac{3}{4}$ (dk. reddish brown)
on top.

Underneath - sandy layer -
54R $\frac{3}{4}$ reddish brown

darker reddish brown
layer strips off from the
lighter brown soil (sandy).

Ashy soil, soils the hand.
wet, loamy.

@ 5m to 30m - have more artifacts
in the S area than north.

3092 (ss)

Lighter brown
soil coming up 104R $\frac{1}{3}$
on outside of darker
ashy soil 104R $\frac{3}{3}$ -
note artifacts in
dark soil.

4/30/85

5
More Porcelain -

Change in soil texture & color @ ca.
6m bcm. - ^{western half} lighter & more
compact w/ less charcoal
content. probably less -
more gravels, sandier. $\swarrow$ 10 YR $\frac{4}{3}$
dk brown

SS contains new soil
darker, ashier soil in southern
most part of well (prob. lens, too)
at same level as lighter
more compact soil. $\searrow$ 10 YR $\frac{3}{3}$
dk brown

At 6m 18cm - shell decreasing
softer soil & ashier in middle
part while outer part of
well shaft is more compact
less ashier - lighter soil & silty clay
Bricks in No. 1 quad ^{underneath}
rim of pipe, E $\frac{1}{2}$ of shaft
have more oxygen shell & brick

Coal, glass

glass, ceramics, porcelain, white ware, shell

Glass, shell, ceramics, feather edge ceramics,
earthenware, bottle glass, flat glasses,

Ceramics, glass, shell, brick.

Artifacts

Glazed brick - clear bottle glass,
brown bottle glass, shell, metal, nails, green
bottle glass, coal, stoneware, MARUAKA
JAR (1862), gin bottle bottom, white
stoneware (green line around edge) -

4 BAGS of Artifacts

Shoe heel, beer bottle necks, coal, brick,
clear bottle glass.

floral pattern iron tone, green glass frags.
brown glass frags, clear glass frags.
coal.

Tin can, whole brown liquor bottle -
forbids sale or reuse of this bottle - lid still on.
brown bottle frags, flask of whiskey (GLASGOW, Scotland)
(whole bottle Scot. whiskey (Large square clear bottle)
(cork intact). P. of glass bottle - bottom frag (prob. beer bottle) →

Clear bottle glass, tin clock frame (painted)
brown bottle frags, very thin clear glass frags.
nail, metal, brown bottle bottom (liquor bottle)
clear wine bottle bottom (101 - 1342) green bottle
(rum) neck portion & part of body, black
rubber (maybe camera tip. Match bottle,
Gin bottle, PARSON'S Ammonia bottle
Large Beer Bottle, 2 small Beer Bottles,
Condiment jar, Squarish bottle,

BAG-2624 (cont.) - (Brown ^{glazed} stoneware)

Green opaque - Cuban rum bottle, - Bicardi
Rum Co. Santiago de Cuba - green opaque
flask - Glasgow Scot. JAMES Buchanan & Co. -
whole brown diamond beer bottle.
Tin (metal) flower pot (?) w/ flowers
on surface (very fragile) -

BAG 2681 - Spongeware mixing
bowl, yellow glazed earthenware.
seltzer bottle - blue w/ brass lid & sprayer,

Artifacts - Notes:

cm central area panning out -
& becoming the lighter more
compact soil that was encircling
the ashly soil. Due S outer
area now dark ashly area.
Goes into E & W areas also.
No longer in the center.
Lighter Soil - Sandy Claysilt. (Compact)
104R $\frac{4}{3}$ brown & the ^{partial}
darker ashly soil on the South
east & west - 104R $\frac{3}{3}$ dark brown
loose silty sandy loam.
becoming more compact - lighter
104R $\frac{5}{4}$ yellowish brown in northern
area @ ca 6m 36cm. More
dark brown & reddish soil surrounds
the lighter soil in the SE & W.
(7.54 $\frac{5}{6}$ & $\frac{4}{6}$ strong brown
striated pattern).
Large Bricks occur in bottom (NE & SE
quadrants)
@ 6m 43.5cm. & a delft pottery
frag occur @ this level in
the NW quad.

Artifacts

66cm Hit log @ 6m 43.5cm in S of
shaft. Ashy soil occurs around
log. More gray soil, loose &
moist. Very sandy. Log came
out & measured 6m 73cm under
the log. Log is circular shape
ca. Got whole pipe bowl, mold-
blown bottle bottom, Wine bottle
top - 1/4 of whole bottle, hand-painted
porcelain, lots of large bones -
probably cow bones. Almost no
shell, little charcoal. Still very
ashy.

3600 Most ARTIFACTS came from
this level. Soil 104R #3 dark brown
wet sandy silt loam, little
Charcoal, large ^{# of} bricks, little
oyster shell. Soil has different
colors because of pockets of diff.
soil colors & texture, Very loose
soil, some of it is ashy
some lighter brown, all mixed
together. Lot polished bone
brush handle, mold-blown bottle
bottom, many pipe stems, nails,
← large # of ceramics (Westwood, Old Manum)

5/7 A lot of brick came
from the west, & south
of well area, 1/2 from
liner some from middle
whole brick in middle,
@ ca. 9m 36cm.

107R $\frac{3}{3}$ dark brown - loose silty
Loamy moist soil; not as
ashy; less charcoal, not as
many gravels, still getting
the goldish sandy soil
clumps as well as clay
clumps dispersed throughout.
Oyster shells still
appearing, more, some
ceramics (delft & enameled
porcelain), glass (some
bottom fragments & neck fragments)
window glass, nails predominant.

More charcoal coming up soil
a bit more compact, little
more gravels, got another large
complete paving stone (tile)
from top of level. Stone from
NW quad. Soil again has
the multi-colored clumps
reddish layer, gold layer,
charcoal layer - much
clay in the red layer.

Soil in south portion of well
Arceuthobium area very soft
& bony - has the yellow schist grains
in it. North $\frac{1}{2}$ more compact, more gravel.
